

MED Nuklear-Medizintechnik Dresden GmbH VYŵa Yg Ūa Ya VYf'cZH Y NUVIA`[fci d

Since 1997, MED Nuklear-Medizintechnik Dresden GmbH has been a daughter company of S.E.A. GmbH (Strahlenschutz-Entwicklungs-und Ausrüstungs-Gesellschaft / Radiation Protection Development and Equipment Company). Both companies have been cooperating very intensively and successfully.

In order to grow further and intensify our business, S.E.A. GmbH has decided to make an important step:

As from now, S.E.A. GmbH and thus also MED Nuklear-Medizintechnik Dresden GmbH belong to the French company NUVIA. With 2,700 employees and a turnover of approx. € 300 million, NUVIA is a centre of competence in the field of nuclear technology. NUVIA is a worldwide operating company. The main markets are France and UK. From the equipment of nuclear-technical facilities to their dismantling, NUVIA offers an extensive program. As a manufacturer of radiation measuring instruments, S.E.A. GmbH completes NUVIA's performance profile.

MED Nuklear-Medizintechnik Dresden GmbH will remain active in the field of measuring instruments for nuclear medicine and radiopharmaceutical production. Using the worldwide channels of NUVIA, we will particularly focus on the further development of our international business. In the new constellation, the management of S.E.A. GmbH and MED Nuklear-Medizintechnik Dresden GmbH as 100% daughter companies of NUVIA remains in the hands of Heinz Kirsch and Günter Werthmann.

We are looking forward to a good and intensive cooperation with the NUVIA group.
